"Fold a sheet of paper, place a bulb behind - and you have a lamp." Although the reality is not that simple, designer Henrik Bønnelycke wants the light to appear as if it is. In terms of shape, Fold is brightly clear, where the selected details and latest LED technology are in focus. The magnetic shade makes the installation simple and the design distinct without visible screws. The light shines up and down, and the four included light patterns change the light based on desire and personal style and are also an element for light dimming.
